

# SE u3a Forum Summer School

Monday 7<sup>th</sup> – Thursday 10<sup>th</sup> September 2026

University of Chichester

## Artificial Intelligence (AI) - Beginners

Maximum 12

Investigate in broad terms what is AI; what can it do; what can't it do.

Noting the fact that this is a very fast-moving technology which may need to be updated even during the week we are meeting.

Explore the advantages and disadvantages of AI and reality of the 'horror stories.'

*AI generated image  
by chatGPT*

Think about the Ethics of the technology. Learn collaboratively from the tutor and each other.

## Summer School Course - 2026

Look at AI in three areas:

1. large LANGUAGE databases including the famous chat Bot GPT, but remember GIGO garbage in garbage, out and including examples of voice-controlled devices e.g. Siri, Alexa, Google microphone
2. VISUAL – AI generated pictures, manipulation, fake news pictures and videos, 'sloping', AI generated music.
3. ROBOTS

Understand where further information can be obtained and ideas for taking your learning forward.
